Consistent gameplay that you can't get anywhere else Realistic player and team animations that make the game feel authentic Authentic audio and music that brings the game to life Seasonal campaigns, story and game modes that remain fresh, interesting, and fun year after year How is FIFA different? FIFA is totally unique in its attention to detail and in its range of game features. FIFA 13 introduced a range of new features that give you options to adapt to your style of play. How will I be able to customize my team in FIFA? Today, players use a wide range of tactics, formations and team selections that vary depending on the match scenario. FIFA 14 introduces Build-up Play: an entirely new way to interact with the game's match engine. Players will no longer make set-piece and free-kick deliveries. Instead, they will drive the ball through the attacking third, finding their teammates with pinpoint accuracy via Build-up Play. Players can now play as both attackers and defenders, and use the Move & Shoot system to be more unpredictable in the final third of the pitch. This will allow you to apply pressure and force the opposing defence to open up the angle for a scoring opportunity. The Move & Shoot system also allows you to boost your team’s pressure on the ball and keep possession at any time. What is FM Total Control? FM Total Control allows you to enter into controls for your teammates to actively adjust the pace and direction of the match. The system will automatically apply or deactivate team plays, depending on how you use the system. A player that is receiving the ball will be able to accelerate or slow down depending on the situation. This

allows the receiving player to evade a challenge, receive the ball in stride and speed towards the goal, or to slow down and adjust the play. FM Total Control is available in all game modes for human players, and is exclusive to bc9d6d6daa
